November 29, 2018

Please be advised that the surface sample of the Lindbergh Elementary School water damaged wall has been analyzed by *EMSL Analytical Inc.* Results of the laboratory analysis of the area sampled were found to have high levels of borne fungi. As a precautionary measure, prior to having the samples analyzed we immediately isolated and scheduled for the remediation of the areas to take place yesterday by *Consolidated Environmental*. Upon completion we have scheduled an air quality test to be performed. I will advise you of the findings upon receiving them. I thank you for your understanding and appreciate your commitment to our children.

Respectfully,

*Joseph Cirillo*
