Please be advised that the surface sample of the Jr/Sr High School water damaged ceiling tile has been analyzed by *EMSL Analytical Inc.* Results of the laboratory analysis of the area sampled were found to have high levels of borne fungi. As a previously mentioned, prior to having the samples analyzed we immediately isolated and scheduled for the remediation of the areas affected. Upon completion we have scheduled an air quality test to be performed. I will advise you of the findings upon receiving them. I thank you for your understanding and appreciate your partnership.

Respectfully,

Dr. Joseph Cirillo
